Verifone Vx510 IP Terminal

United Bank Card has added this ultra high performance terminal to its Free Equipment Program. The Vx510 offers flexible, secure and high speed communications for all of your business needs.

FLEXIBILITY

The Vx510 offers a choice of two connectivity options: Ethernet and dial. The dual communications options allow built-in dial capability to be used today, then switched to Ethernet at any time. Merchants with existing broadband service can immediately process payments. It's simple, reliable and future-proof.

SECURITY

The PCI PED approved Vx 510 also offers the latest and most reliable security protections, including SSL, 3DES encryption, MasterCard PTS, Master/Session and DUKPT key management. Also, VeriFone's VeriShield file authentication software provides unsurpassed protection against unauthorized access to payment devices, while securely accommodating trusted third parties.

EASY TO USE DESIGN

Intuitive ATM-style interface, large backlit display, ergonomic keys and bold menu prompts minimize clerk training, speed lines and reduce errors. Additionally, the sleek and stylish Vx510 has an extremely small footprint to save counter space and utilizes a "hand-over" design for customer PIN entry.

ADD A FREE VERIFONE Vx510 TO YOUR LOCATION TODAY!

The Verifone Vx510 offers extraordinary performance for payment and value-added applications and it dramatically reduces transaction time to just a few seconds. Contact United Bank Card today to add this versatile terminal to your location absolutely free of charge!
